

Accpac Solutions for Finance

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions, which allow you to grow, from the modular Accpac ERP suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers, delivering classic CRM components including sales force automation, customer care, marketing including emarketing and Web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Integrate Systems, Gain Control and Create Intelligence

In today's challenging conditions, companies require complete and expert coverage of the financial functions landscape to provide a 360 degree view of the company's performance, financial accounting, budgeting and consolidations.

The key features that drive the success of an ERP implementation in this environment include:

- End-to-End integration of all software modules, a single shared repository and the automation of financial processes to increase productivity through traceability of financial flows, workflows and alerts.
- Complete and automatic updating of regulatory constraints including IFRS and SARBOX.
- Reports and control panels including key performance indicators to assist in executive board reporting for strategic decisions and risk anticipation.
- Operate make-to-stock & make-to-order environments.
- Manage data input through simple visual business process flows.
- Sophisticated integration engine for seamless real time or batch connections to operational systems to ensure accurate data transfer.

For more information on how Accpac solutions can fit your business, please feel free to contact us as detailed below, for a FREE needs assessment or product presentation tailored to your needs.

Keith Fenner
Vice President, Strategic Sales

- Supports multi-lingual and multi-legislation for true African and global ERP rollouts.
